

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

RECOMMENDATIONS.

SINCE the scientific labours of Mr. Walker have rescued English orthoepy from the arbitrary dictates of pedantry, and the fluctuations of caprice, a correct pronunciation seems almost to have become a criterion of good breeding and a liberal education. There will always be, it is probable, some words of a pronunciation so ambiguous, that even among polite speakers, a difference will prevail, and each must be left to the guidance of his own ear: but, it is much to be doubted, whether any lexicographer will ever approach nearer than Mr. Walker, to the establishing of a correct standard. He has exhibited such a philosophical knowledge of language, such extensive observation, such profound investigation of analogy, with such clearness of method and perspicuity of style, as to render any material improvement, at present, rather to be wished than expected. Although we do not consider Mr. Walker's Dictionary infallible, yet it appears to us eminently the best guide to a correct and elegant pronunciation of our language.—*Critical Review.*

Walker's Dictionary is selected as the most suitable for the use of schools, because it is in much more general use than any other; and, by general consent, in all countries where the English language is spoken, is allowed, and taken to be the most correct standard of pronunciation. It is important, for the uniformity and perpetuity of our language, that such a standard should be generally adopted; and it is hoped the time is not far distant, when this book will be the only legitimate authority for the orthography and pronunciation of the English language.

PREFACE.

FEW subjects have of late years more employed the pens of every class of critics, than the improvement of the English Language. The greatest abilities in the nation have been exerted in cultivating and reforming it; nor have a thousand minor critics been wanting to add their mite of amendment to their native tongue. Johnson, whose large mind and just taste made him capable of enriching and adorning the Language with original composition, has condescended to the drudgery of disentangling, explaining, and arranging it, and left a lasting monument of his ability, labour, and patience; and Dr. Lowth, the politest scholar of the age, has vailed his superiority in his short Introduction to English Grammar. The ponderous folio has vindicated the rights of analogy; and the light ephemeral sheet of news has corrected errors in Grammar, as well as in politics, by slyly marking them in Italicks.

Nor has the improvement stopped here. While Johnson and Lowth have been insensibly operating on the orthography and construction of our Language, its pronunciation has not been neglected. The importance of a consistent and regular pronunciation was too obvious to be overlooked; and the want of this consistency and regularity has induced several ingenious men to endeavour at a reformation; who, by exhibiting the regularities of pronunciation, and pointing out its analogies, have reclaimed some words that were not irrecoverably fixed in a wrong sound, and prevented others from being perverted by ignorance or caprice.

Among those writers who deserve the first praise on this subject, is Mr. Elphinston; who, in his Principles of the English Language, has reduced the chaos to a system; and, by a deep investigation of the analogies of our tongue, has laid the foundation of a just and regular pronunciation.

After him, Dr. Kenrick contributed a portion of improvement by his Rhetorical Dictionary; in which the words are divided into syllables as they are pronounced, and figures placed over the vowels, to indicate the different sounds. But this gentleman has rendered his Dictionary extremely imperfect, by entirely omitting a great number of words of doubtful and difficult pronunciation—those very words for which a Dictionary of this kind would be most consulted.

To him succeeded Mr. Sheridan, who not only divided the words into syllables, and placed figures over the vowels, as Dr. Kenrick had done, but, by spelling these syllables as they are pronounced, seemed to complete the idea of a Pronouncing Dictionary, and to leave but little expectation of future improvement. It must, indeed, be confessed, that Mr. Sheridan's Dictionary is greatly superior to every other that preceded it; and his method of conveying the sound of words, by spelling them as they are pronounced, is highly rational and useful.—But here sincerity obliges me to stop. Numerous instances of impropriety, inconsistency, and want of acquaintance with the analogies of the Language, sufficiently show that his Dictionary is upon the whole imperfect, and that ample room was left for attempting another, which might better answer the purpose of a Guide to Pronunciation.

The last writer on this subject is Mr. Nares, who, in his Elements of Orthoepey, has shown a clearness of method and an extent of observation which deserve the highest encomiums. His Preface alone proves him an elegant writer, as well as a philosophical observer of Language; and his Alphabetical Index, referring near five thousand words to the rules for pronouncing them, is a new and useful method of treating the subject: but he seems, on many occasions, to have mistaken the best usage, and to have paid too little attention to the first principles of pronunciation.

Thus I have ventured to give my opinion of my rivals and competitors, and I hope without envy or self-conceit. Perhaps it would have been policy in me to have been silent on this head, for fear of putting the Publick in mind that others have written on the subject.

well as myself; but this is a narrow policy, which, under the colour of tenderness to others is calculated to raise ourselves at their expence. A writer who is conscious he deserves the attention of the Publick, (and unless he is thus conscious he ought not to write) must not only wish to be compared with those who have gone before him, but will promote the comparison, by informing his readers what others have done, and on what he founds his pretensions to a preference; and if this be done with fairness and without acrimony, it can be no more inconsistent with modesty, than it is with honesty and plain dealing.

The work I have offered on the subject has, I hope, added something to the publick stock; as I have endeavoured to unite the science of Mr. Elphinston, the method of Mr. Nares, and the general utility of Mr. Sheridan.

With respect to the explanation of words, except in very few instances, I have scrupulously followed Dr. Johnson. His Dictionary has been deemed lawful plunder by every subsequent lexicographer; and so servilely has it been copied, that such words as he must have omitted merely by mistake, as *Predilection*, *Respectable*, *Descriptive*, *Sulky*, *Inimical*, *Interference*, and many others, are neither in Mr. Sheridan's, Dr. Kenrick's, nor several other Dictionaries.

N. B. The above preface is extracted from that originally prefixed to the quarto Dictionary by Mr. Walker.
